

BANDO

TENSION MASTER

NEXT GENERATION TENSION METER

Presenting the most accurate belt tension measuring device ever introduced into the market.

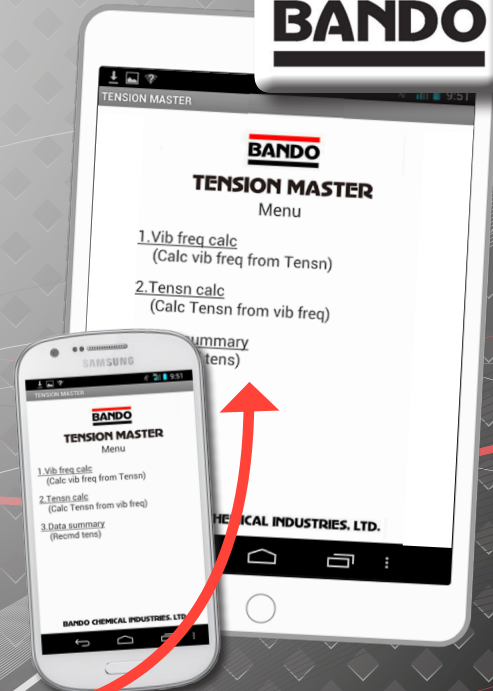

Tension Master

Measures the vibration characteristics of the belt, not the air around the belt, for the most exact measurements

Item #: BUI 4006

Input results to our convenient app to display and save!

App for iOS & Android

Tension Results: The calculated results are automatically displayed in the *Tension Master* app. Corrections to the drive can then be made and re-checked.

* Can also be used to measure vibration characteristics of industrial machinery & construction equipment.
